PROFESSIONAL EXPERIENCE

Generative AI Engineer, *Prodigy InfoTech*

01/2026 – 02/2026

- Gained strong foundational knowledge in AI and real-world applications through hands-on project experience as a Generative AI Engineer.
- Developed practical skills in problem-solving, innovation, and use of industry-relevant tools.
- Enhanced technical abilities, confidence, and built a professional mindset.

EDUCATION

B.E-Mechatronics Engineering, *Sns College Of Technology*

09/2024 – 05/2028

- cgpa-8.22

SKILLS

Programming Languages

- Python
- SQL
- Typescript
- HTML
- CSS
- React
- Javascript

Soft skills

- Communication Skills
- Problem Solving
- Leadership

COURSES

The Future Of Payment Technology, *University of Michigan*

- The Future Of Payment Technology program by the University of Michigan, exploring innovations in digital payments, blockchain, and fintech ecosystems.

Google Data Analytics, *Google*

- Completed the Google Data Analytics Professional Certificate, gaining practical experience in SQL, R, Tableau, data cleaning, and analysis.
- Strengthened data storytelling and analytical problem-solving skills for real-world business use.

ACHIEVEMENTS

GitHub

01/12/2024

- Achieved 987+ GitHub contributions in 2025, demonstrating consistency and commitment to continuous development.
- Contributed to multiple projects using JavaScript, showcasing strong problem-solving and debugging skills.
- Recognized for collaboration and effective support in successful project delivery.

PROJECTS

Studentshub

- Developed a centralized platform for students to discover and access curated resources, tools, and opportunities.
- Focused on usability and scalability using modern web technologies (TypeScript-based stack).

BloodLink - Blood Bank Management System

- Built a full-stack system to manage donor records, blood inventory, and request handling efficiently.
- Improved real-time availability tracking and streamlined communication between donors and recipients.

RoadSoS — Offline-first emergency response PWA

- Built an AI-powered triage assistant (OpenRouter + Mistral) with crash detection via DeviceMotionEvent, enabling immediate first-aid guidance without network dependency
- Implemented platform-aware navigation deeplinks, Haversine-based ETA sorting, and Appwrite Realtime for live incident tracking

Fraud Transaction Detection Website

- Developed a web-based system to detect fraudulent transactions using machine learning models.
- Implements real-time analysis and classification to enhance financial security and risk mitigation.
